## A great engineer...

Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world.

Build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users.

Critique, evaluate and test their ideas and products and the work of others.

Understand and apply the principles of nutrition and learn how to cook.

## Design and Technology objectives

Design purposeful, functional, appealing products for themselves and other users based on design criteria.

Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology.

Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing). Select from a range of materials and components.

Explore, evaluate a range of existing products against a design criteria.

Use the basic principles of a healthy and varied diet to prepare dishes. Pupils are to understand where food comes from.
